

SAULO JOAB

"I want to change the world through technology."

SAULOJOAB
SAULOJOAB
SAULOJOAB

WHO AM I?

My name is [Saulo Joab](#), I'm a brazilian software developer with 6+ years of experience in the market and a passion for creating awesome things with code. I enjoy working in teams and collaborating with others to achieve a common goal, but I can also work independently and solve problems on my own. When I'm not coding, you can usually find me doing one of three things: playing music, cooking up some delicious dish in the kitchen, or diving into some of my favorite anime, movies, and other media.

My favorite part of software development is seeing my code come to life and [making a real impact on people's lives](#). I'm proud to say that I've created some cool applications that have helped people stay organized, buy houses, fix lampposts, save time, and even have a little fun. I'm always looking for new challenges to sink my teeth into. But, no matter what I'm working on, I always strive to balance technical excellence with practicality and real-world results.

If you're looking for a software developer who's equal parts technical expertise and real-world experience, and is willing to make a difference, look no further! Let's create something awesome and [change the world](#) together.

SKILLS

- ReactJS
- Javascript
- Typescript
- NodeJS
- GraphQL
- Redux
- Python
- MongoDB

COMPETENCIES

- Adaptability
- Problem-Solving
- Time Management
- Communication
- Leadership
- Eternal Learner
- I can make a very good chicken fricassee

LANGUAGES

- English: Very Advanced
- Portuguese: Native
- Spanish: Basic

EXPERIENCE

"this is what i've been working on."

BEKAGM - React Native Lead

2022 – 2023

As the leader of the mobile development team in a real-state tokenization app, I was able to gain deeper expertise in mobile development, particularly in React Native. My experience with this technology allowed me to design and implement key features of the app, ensuring that it functioned effectively and was user-friendly.

Collaborating with experts, including members of the Eurobank Private Bank of Luxembourg, provided valuable insight into the highest standards for app development. My experience in handling complex projects and working alongside high-caliber individuals has equipped me with a solid foundation to tackle new challenges and create innovative solutions.

SKILLS: React.js – Typescript – React Native – JavaScript – GraphQL – Redux.js – Scrum – Azure DevOps

NATA.HOUSE - Javascript Software Developer

2021 – 2022

As a full-stack developer at nata.house, I was responsible for developing and deploying a diverse range of web applications, with a particular focus on front-end development. Leveraging my deep understanding of Typescript, React.js and Javascript, I consistently delivered user-friendly interfaces that met the needs of our clients. Whether developing streamlined networking applications or complex estate selling platforms, I was committed to delivering responsive, intuitive front-end solutions that provided an exceptional user experience.

While my expertise in Node.js and back-end development was also utilized in the development process, my primary focus was on front-end development. I collaborated closely with cross-functional teams, utilizing Github and Bitbucket to ensure efficient code management and collaboration throughout the development process.

Skills: React.js – Typescript – JavaScript – Scrum – Node.js – Github – Bitbucket

Enel Brasil - Full Stack Developer Intern

2019 – 2021

During my internship at Enel Brazil, I took on a multifaceted role that extended beyond the typical responsibilities of an intern. With no other members in the development team, I assumed a comprehensive position where I independently conceptualized, designed, and executed various projects aimed at enhancing task efficiency.

As the sole contributor to the development efforts, I harnessed a wide array of skills to fulfill the demands of the role effectively. Leveraging my expertise in React.js, JavaScript, and React Native, I crafted intuitive and user-friendly front-end solutions. I also delved into back-end development using tools like Express.js and Node.js, ensuring seamless interactions with databases such as SQL and MongoDB for robust data management.

Navigating Agile methodologies, I collaborated with other departments to align projects with organizational goals and deliver optimal outcomes. Despite the challenges of being a solo developer, I adeptly managed version control using Git and maintained structured codebases for seamless team collaboration.

In addition to my core responsibilities, I ventured into mobile app development, utilizing React Native to create cross-platform applications that offered consistent user experiences.

My internship at Enel Brazil not only provided me with valuable hands-on experience but also instilled in me a strong sense of autonomy, resourcefulness, and adaptability. This unique opportunity to function as an entire development team has significantly enriched my skill set and prepared me to excel in complex and dynamic work environments.

ALLUGO! - Co-Founder and CDO

2019 – 2020

In my role as co-founder and Chief Design Officer (CDO) at AlluGo!, I took part in establishing and leading a dynamic startup that tackled both economic and ecological challenges. By utilizing my skills in React.js, JavaScript, and React Native, I spearheaded the development of a user-friendly front-end that facilitated seamless interactions for book rentals.

My leadership abilities were put to the test as I not only co-founded the company but also led a team through the intricacies of app creation. I fostered collaboration and unity among team members, ensuring our efforts aligned with Agile methodologies for efficient development.

On the technical side, I dived into Express.js and Node.js for back-end functionalities, proficiently working with databases like SQL and MongoDB to ensure robust data management. My adeptness with Git and version control, along with continuous integration practices, maintained the integrity of our codebase and facilitated smooth teamwork.

Beyond coding, I actively contributed to mobile app development, using React Native to establish cross-platform compatibility and provide an engaging user experience..

SKILLS: React.js – React Native – MySQL – NodeJS – Business Management – Leadership

ÉBUSCA - Co-Founder and CDO

2018 – 2019

During my tenure as a co-founder and CDO at ÉBusca, I played a pivotal role in the establishment of a startup dedicated to providing effective solutions for locating trustworthy technical assistance. My focus primarily involved back-end programming, utilizing technologies such as Express.js and Node.js to ensure the seamless functionality of the platform.

As Head of the Development Department, I embraced leadership responsibilities, fostering a collaborative and innovative team environment. My proficiency in React.js and React Native contributed to the platform's user interface, enhancing user experiences through intuitive design and interactions.

I navigated Agile methodologies to streamline development processes, adhering to version control practices and continuous integration to maintain a coherent and efficient codebase. By leveraging my expertise in databases, including SQL and MongoDB, I ensured robust data management and storage capabilities.

SKILLS: React.js – React Native – MySQL – NodeJS – Business Management – Leadership

ALLER SOLUÇÕES - Front End Development Intern

2017

During my 4-month internship at Aller Soluções, I engaged in various projects as a back-end developer, primarily using Asp.Net. These projects ranged from company management systems to e-commerce platforms. My role allowed me to gain practical experience with frameworks in C# development, such as Entity Framework and Ninject. I also had the opportunity to dabble in front-end development using Bootstrap and frequently worked with JavaScript.

My time at Aller Soluções provided me with hands-on experience in real-world development scenarios, sharpening my technical skills and exposing me to diverse project requirements. This exposure enriched my understanding of both back-end and front-end development practices within a professional context.

Furthermore, the collaborative atmosphere at Aller Soluções enabled me to work closely with experienced developers, fostering a culture of knowledge sharing and skill enhancement. Engaging in code reviews and discussions not only refined my coding practices but also allowed me to grasp the importance of teamwork in producing high-quality software solutions. This internship served as a pivotal step in my journey, solidifying my passion for software development and equipping me with the practical insights necessary for a successful career in the field.

SKILLS: Asp.Net MVC – Entity Framework – Ninject – Bootstrap – Javascript – HTML – CSS – C# – MySQL

EDUCATION

"this is what i've been studying."

Information Systems

2018 - 2023 - Federal Institute of Education, Science and Technology of Ceará

While enrolled on the Information Systems Bachelor, I participated at LITE (Laboratory of Innovation on Educational Technologies) for about 1 semester as a developer, on a educational Unity game named 'World of Science'. I also participated on some projects from LAIS (Laboratory of Information Systems), also as a developer.

I'm still enrolled on the course, and will finish it in 2023.

Computer Technician

2015 - 2017 - EEEP Governador Virgílio Távora (High School with Technical Degree)

I attended the professional technician course, which lasted 3 years in total. There, I acquired knowledge on the most diverse and useful WEB languages, such as PHP, Javascript, HTML and CSS and developed many Java applications for studying purposes. I also developed a computer game called Katiquiz, which was actually used by the school to help students study for chemistry, focused on the ENEM test.

Besides that, I also enrolled in a 60 hour course on company management, where I developed skills very important to a business environment, such as leadership and project management. By the end of the course, I also had a 4 month internship at Aller Solutions, which allowed me to actually use all the knowledge I acquired during the course on a professional setting.

THE END

"Or, maybe, a new beginning. Coding is my fuel and my biggest dream is to make the world a better place using it."

"I'm always open for new opportunities. Feel free to get in touch."
